AMENDMENT

Sir:

In response to the outstanding Office Action dated August 8, 1988, please amend the above-identified application as follows.

IN THE CLAIMS:

Please cancel claims, 1, 2, 3 and 5 without prejudice or disclaimer.

A. (Amended) A semiconductor memory device comprising means receiving address information consisting of N bits (N being a positive integer), an array of memory cells arranged in a matrix form of rows and columns, each of said memory cells having the same structure, the number of said memory cells in said array being larger than [the] 2^N , said memory cells in said array being divided into a peripheral group and an internal group, the memory cells of said internal group being completely surrounded by the
